

With Daikin i-text your mobile is now a remote control.

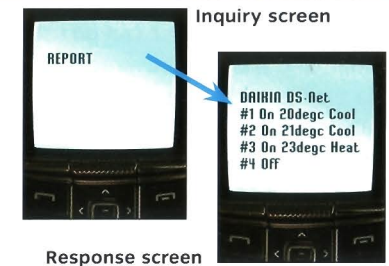

Now you can arrive home to perfect air conditioned comfort simply by using your mobile phone. i-text is the latest advance in Daikin technology that allows you to switch your air conditioning "on" or "off", select your ideal temperature or to check current settings, all via text message. For your peace of mind, it then texts you back to confirm your instructions have been carried out.

How i-text works

Your Daikin specialist can quickly install the i-text adapter and modem to new or most existing Daikin ducted air conditioning systems. This technology then makes it possible to simply send a message from your mobile and control your Daikin Air Conditioner.

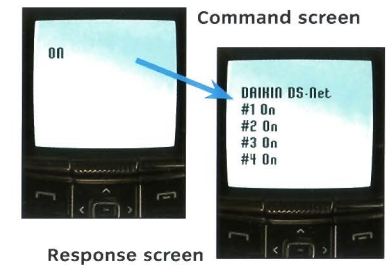

Keeping an eye on your air conditioner remotely

When you're out, i-text lets you keep an eye on your Daikin's settings. Especially handy if there is someone left in the house who might not know how to operate your air conditioning unit. Also handy if you've left the house and forgotten whether you've turned it off or not.

Arriving home to a comfortable temperature

Whether it's summer or winter, you can always walk into your home and know the temperature will be just as you want it. Instead of waiting until you get home to turn the air conditioner on, send a text message from your mobile and your Daikin with i-text will carry out your instructions.

Instant notification if anything goes wrong

In the unlikely event of a malfunction occurring while you're out, a message will be sent to your mobile displaying an error code. This will allow you to have the problem diagnosed and rectified much quicker.

Malfunction Notification Display
